Proposers:

We recently publicly noticed a Request for Letters of Interest on the above referenced specification

A. Changes to the Qualifications

The responsibilities of the Consultant on this project are:

Firm shall be prequalified by FDOT in ~~11.0—Engineering Construction, Administration and Management~~ 10.1 – Roadway CEI at the time of response

B. Questions To Date

Question - The RLI addresses a survey scope of work. It includes scope items that would typically be involved in design which will affect pricing for the work vis-à-vis the allowance mandated by FDOT. Does the surveyor have to carry FDOT qualifications? Will the surveying efforts be required to conform to FDOT standards with regards to data collection and formatting and output?

Answer - They should be technically qualified. The efforts, data collection, formatting, etc. do not have to be to FDOT standards since these projects are not on our system.

Question - Does the prime submitter have to carry the FDOT certified inspector or can a sub carry the designated certifications.

Answer - Since these projects are off the state highway system, all we are concerned about is that they have the qualified staff capable of doing the required testing. It can be fulfilled via the prime and/or sub. If the prime is not qualified, then he is brokering the project. You'll need to decide if you're going to hold to the FDOT pre-qualification requirement. The prime will ultimately responsible.
