PART A SUMMARY

In the past two years alone, Escambia County has been severely impacted by two major hurricanes, Ivan and Dennis and brushed by a third, Hurricane Katrina. These events resulted in more than 9 million cubic yards of debris – including vegetative material, construction and demolition debris, and beach sand – littered throughout Escambia County. The Disaster Debris Management Plan, included in and referred to in this solicitation, was commissioned by the County for many reasons, but most importantly to provide a plan to rapidly initiate and implement a successful disaster debris removal program.
