Escambia County Engineering Department, Traffic and Development Division
TRAFFIC VOLUME and LEVEL OF SERVICE REPORT
Footnotes

- (1) Road Number as designated by Florida Department of Transportation (FDOT) or County.
- (2) On Street of which roadway facility is established. Street names consistent with county 911 addressing.
- (3) Roadway Facility for which level of service is being determined.
- (4) Number of through lanes for each segment. U = undivided, L = lanes, O = one way, D = divided. Note: * = project is scheduled for construction within three years.
- (5) Area Type based on the *2002 FDOT Quality / Level of Service Handbook*, p. 47. U = urbanized, T = transitioning, RU = rural undeveloped, and RD = rural developed.
- (6) Roadway Class based on the *2002 FDOT Quality / Level of Service Handbook*, p. 52. L = local road (non-state roadway).
- (7) Level of Service (LOS) Performance Standard, Source: Escambia County Comprehensive Plan, Amendment 2002-01.
- (8) Source of Count: Supplied by FDOT, County (Escambia), or Consultant. N/A = Not Available.
- (9) Count Station Number of FDOT or County sites. NC = No Count.
- (10) Date of Count. A 12/31 date indicates that the Annual Average Daily Traffic (AADT) count was used to determine the PM PH volume. N/A = Not Available.
- (11) 2-Way P.M. Peak Hour (between 4 and 6 P.M.) Counted Volume. If more than one count, the average was used. NC = No Count.
- (12) Axle Factor based on *2001 Florida Traffic Information CD*, FDOT.
- (13) Seasonal Factor based on *2001 Florida Traffic Information CD*, FDOT (K factor = 0.09+ for AADTs).
- (14) 2-Way P.M. Peak Hour (between 4 and 6 P.M.) Factored Volume (column 11 x column 12 x column 13 = column 14).
- (15) Allocated (committed) Trips for the P.M. peak hour (between 4 and 6 P.M.) totaled for each approved project.
- (16) Total Trips is the factored volume plus allocated trips (column 14 + column 15 = column 16).
- (17) Revised Service Volume from additional analysis. As of Sept 2002: AP = ARTPLAN; HP = HIGHPLAN; and FP = FREEPLAN. Prior to Sept 2002: AT = ARTTAB and UT = U2LNTAB.
- (18) 2-Way Peak Hour Service Volume based on the *2002 FDOT Quality / Level of Service Handbook*, Tables 4-4, 4-5, and 4-6 for Urbanized areas.
- (19) Percent of Service Volume Used is determined by dividing the total trips by the appropriate 2-way peak hour service volume. If the roadway segment is on a designated hurricane evacuation route ("Yes" for column 24), then column 18 is the appropriate 2-way peak hour service volume (column 16 / column 18 = column 19). If the roadway is not on a designated hurricane evacuation route ("No" for column 24), then column 23 is the appropriate 2-way peak hour service volume (column 16 / column 23 = column 19).
- (20) Available Trips determined by subtracting the total trips from the 2-way peak hour service volume. If the roadway segment is on a designated hurricane evacuation route ("Yes" for column 24), then column 18 is the appropriate 2-way peak hour service volume (column 18 - column 16 = column 20). If the roadway is not on a designated hurricane evacuation route ("No" for column 24), then column 23 is the appropriate 2-way peak hour service volume (column 23 - column 16 = column 20).
- (21) 1 % of the 2-way PH Service Volume (column 18 x 0.01 = column 21).
- (22) 5% of the 2-way PH Service Volume (column 18 x 0.05 = column 22).
- (23) 110% of the 2-way PH Service Volume (column 18 x 1.10 = column 23).
- (24) Hurricane Evacuation Route based on the *Escambia County Hurricane Preparedness Manual CD* and Escambia County Comprehensive Plan.
- (25) Federal Functional Classification: PA = Principal Arterial; MA = Minor Arterial; and C = Collector.

Escambia County Engineering Department, Traffic and Development Division

The following pages contain the "Traffic Volume and Level of Service Report" for Escambia County.

Caution should be used when using any data that was collected prior to 2002.

The date data was collected is documented in column 10 of the report. If the date is prior to 2002 (i.e., 2001, 2000, 1999, etc.), please contact Escambia County Engineering Department at 850.595.3434 for the most up-to-date traffic volume and level of service information. Thank you.

Disclaimer

The Escambia County Engineering Department and staff are constantly working to provide and publish the most current and accurate information possible. However, the current data is subject to change without notice.

One must remember that the primary use of the data contained is to aide and assist in making development decisions. No responsibility or liability is assumed for inaccuracies or errors. The accuracy of information provided through links to other sites is the responsibility of that entity. Please govern yourself accordingly.
